

Your Reliable Point-Repair Products Provider.

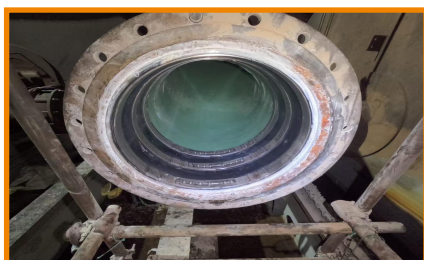

INTERNAL PIPE JOINT SEAL

RELIANCE internal pipe joint seals are engineered with a robust combination of stainless steel sleeves, high-grade rubber, and essential accessories. Thanks to the RELIANCE team's continuous innovation in rubber materials and stainless steel ring structures, our seals are optimized for diverse applications, including sewage, drinking water, steam, seawater, chemical, and oil pipelines.

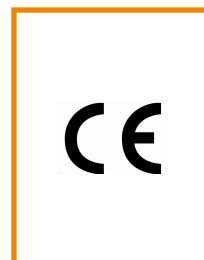

PROJECTS

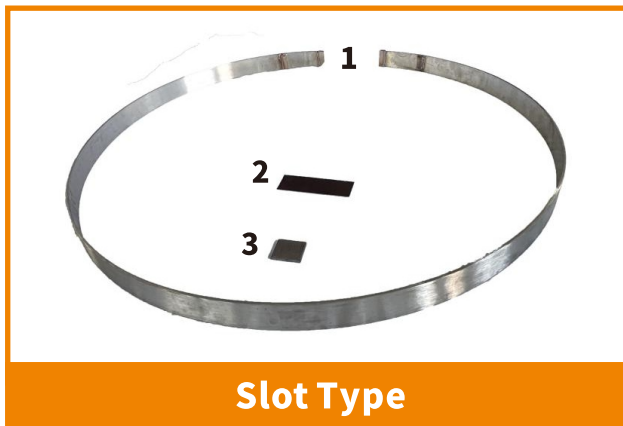

Australia
DN465-350 width

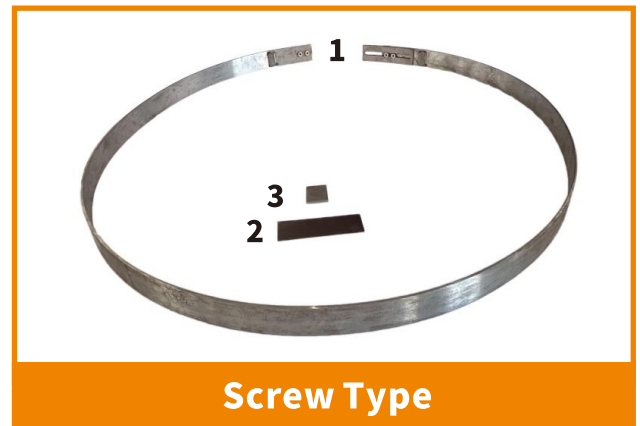

Russia
DN1600-500 width

USA
DN200-DN190

Slot Type

Screw Type

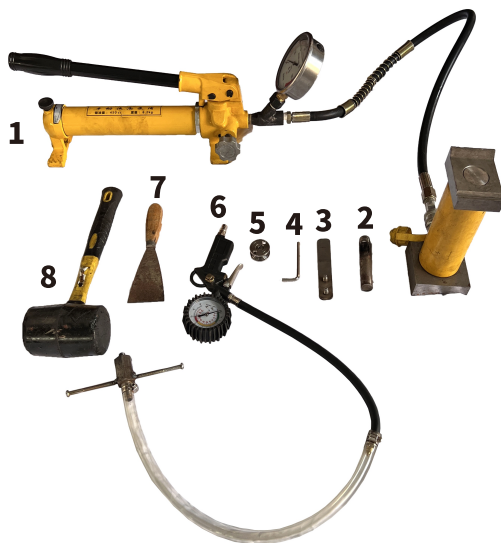

◆ **1. Stainless Steel Sleeve** ◆ **2. Anti-Wear Gasket** ◆ **3. Embed Fixed Block**

There are two ways to install Stainless Steel Sleeve part: Slot Type and Screw Type.

Material Options: AISI 304, 316L and 318L (2205)

Rubber Width Option: 270mm, 350mm, and 500mm

Size Range: DN200-DN3000 (Customizable Based on Customer Requirements)

◆ **1. Installation Tools**

◆ **2. Drilling Screw**

◆ **3. Drilling Wrench**

◆ **4. Hexagonal Wrench**

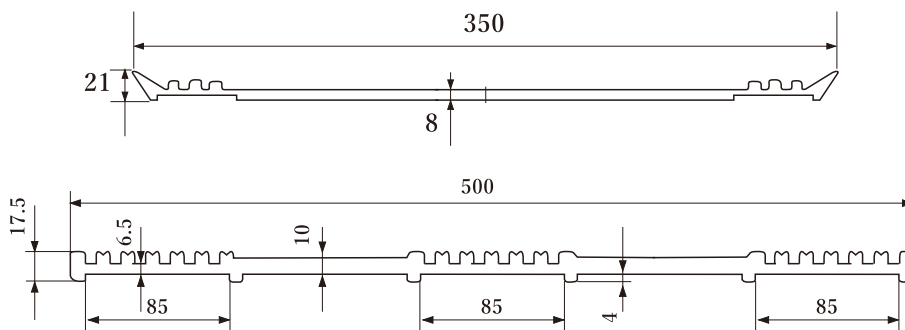

◆ **5. Nipple Tester**

◆ **6. Gauge**

◆ **7. Shovel**

◆ **8. Rubber Hammer**
